

Randwick racecourse, Sydney NSW

Randwick race track, operated by the Australian Jockey Club, Sydney New South Wales. It has a circumference of 2,213 metres and the straight is 410 metres long. This large course has sweeping bends and gives all runners a chance at winning. Not the best wet weather course due to poor drainage.

Barrier Guide

- **1000 metres:** This barrier is located in a small chute off the course proper and provides a short angled run of 50 metres to the course proper and then runners have a straight run of nearly 550 metres to the home turn. Inside barriers are a slight advantage.
- **1200 metres:** Similar to the 1000 metres in another chute off the course proper. Runners travel on a slight angle for 250 metres till they reach the course proper and then there is a straight run of nearly 550 metres to the home turn. Inside barriers are a slight advantage.
- **1400 metres:** This start is located in a 3rd chute off the course proper. There is an angled run of 450 metres to the first corner then a good straight run to the home turn. Inside barriers have a slight advantage.
- **1600 metres:** This barrier is located at the end of a chute off the course proper. There is a straight run of 650 metres to the first turn. Inside barriers have a slight advantage.
- **2000 metres:** This barrier starts on the course proper in the turn out of the straight. Runners are on a turn for 450 metres. Field sizes are restricted to 14 runners. Inside barriers have a big advantage.
- **2400 metres:** This barrier starts on the course proper only 200 metres before the winning post, after which runners enter the sweeping double turn out of the straight. Inside barriers have a clear advantage.
- **2600 metres:** This barrier starts on the course proper 400 metres before the winning post, after which runners enter the sweeping double turn out of the straight. Inside barriers have an advantage.
- **3200 metres:** This barrier starts near the 1000 metres start. There is a straight run of nearly 600 metres to the first turn. Inside barriers are a slight advantage.
