

Victoria Park racecourse, Adelaide SOUTH AUSTRALIA

Victoria Park race track is controlled by the SAJC, Adelaide South Australia. The main track has a circumference of 2,360 metres with a 601 metres straight. The inner track is 1,960 metres with a straight 428 metres long. A chute extends off the main straight with 900 metres and 1000 metres races having a straight run to the winning post. The home straight is the longest in Australia. A fair even course.

Barrier Guide

- **1000 metres:** The start here is located in a chute at the end of the home straight. It provides runners with a straight run to the finishing wire. Barriers don't really come into play here.
- **1450 metres:** Is located in the back straight on the course proper giving runners only about 200 metres before the first of 2 turns. Inside barriers are important here.
- **1500 metres:** Same as the 1450 metre start but now gives runners 250 metres of straight run before the turn. Inside barriers a distinct advantage.
- **1600 metres:** Similar to the 1450 metres start, situated on the course proper in the back of the straight. There is a straight run of 350 metres to the turn. Inside barriers have an advantage.
- **1650 metres:** Same as the 1600 metre start.
- **1800 metres:** Situated on the course proper in the back of the straight. Runners have a straight run of 550 metres before having to negotiate the sweeping turn. Inside barriers have a slight advantage.
- **2000 metres:** Situated in a chute off the course proper in the back straight. This provides runners with a straight run of 750 metres before the sweeping turn. Inside barriers have a slight advantage.
- **2600 metres:** Starts in the home straight and provides runners with a straight run of 200 metres before the first turn. Inside barriers are favoured.
